PROFESSIONAL EXPERIENCE

Software Engineer

Perfect Laser Technologies 

01/2024 – Present

Gauteng, Johannesburg

- **Architected "Smart Laser,"** a full-stack maintenance CRM using React and PostgreSQL that streamlined technician workflows and reduced maintenance turnaround by 30%.
- **Engineered an AI-driven support ecosystem** using a custom LLM and NLP, automating 60% of technical support queries and significantly reducing operational overhead.
- **Developed a distributed inventory system** in PHP to synchronize real-time stock levels across multiple branches, enhancing data integrity and supply chain transparency.
- **Implemented automated customer touchpoints** via Meta API and webhooks, resulting in a 25% increase in user engagement.
- **Optimized high-traffic e-commerce platforms** (PerfectLaser.co.za , etc.) by integrating courier APIs and SEO pipelines to scale digital revenue.

Front-End Software Developer

Tranquility Clinic 

01/2023 – 12/2023

Gauteng, Johannesburg

- **Designed and deployed responsive UI components** for a digital consultation platform, prioritizing accessibility and modern UX standards.
- **Collaborated with cross-functional teams** to produce data-driven market research and technical visualizations for successful investor pitch decks.

PROJECTS

Aurora Detect

Fraud Detection System

- **Developed a serverless event-driven architecture** using AWS Lambda and Kinesis to monitor and flag fraudulent financial transactions in real-time.+2
- **Utilized DynamoDB for high-throughput data storage** and SNS for low-latency fraud alerts and notifications

Dashora

Multi-Site Analytics Dashboard

- **Built an aggregation engine** that fetches and normalizes metrics from multiple WooCommerce and Google Analytics v4 accounts via AWS Lambda.+1
- **Implemented a secure API layer** using Amazon API Gateway and Secrets Manager to manage sensitive credentials across multiple client stores.

AI Chatbot for Support

AL & ML Model

- Python, Custom LLM, NLP
- Automated 60% of technical support queries, improving resolution time.

CERTIFICATES

AWS Certified Developer Associate 2025 DVA-C02 [↗](#)

AWS Certified Solutions Architect Associate Certification - 2025 [↗](#)

Data Engineering on Microsoft Azure

The Complete JavaScript Course 2025: From Zero to Expert

Certified Intro to Node.js (LFW111) – The Linux Foundation

Become a WordPress Developer

REST API Design & Management

APIs in PHP: Basic to Advanced

Introduction to RESTful APIs

SKILLS

Languages & Frameworks ● ● ● ● ●
Python, PHP, Node.js, JavaScript, React, Next.js, Vue, Django, Tailwind CSS

Cloud & DevOps ● ● ● ● ●
AWS (Lambda, Kinesis, DynamoDB, SNS), Azure, Google Firebase, REST APIs, Webhooks

AI & Data: ● ● ● ● ●
Custom LLM Integration, NLP, TensorFlow, Google Analytics v4, Looker Studio

AWARDS

Full Senior Colours 2021
Greenside High School
Robotics, Chess, and Swimming

World Robotics Olympiad [↗](#) 2017
World Robot Olympiad™ Association
Future Innovators Category
Developed a robotics solution addressing a real-world problem, earning **1st place at the South African Nationals (2017)**. Represented South Africa at the **World Robot Olympiad Finals in Costa Rica**, competing against teams from **20+ countries**.
